-- Th MAILING DATE of this communication appears on the cover sheet with the corresponding address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Sep 19, 2000
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 35 C.D. 11; 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-48 is/are pending in the application.
- 4a) Of the above, claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-48 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claims _____ are subject to restriction and/or election requirements.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are objected to by the Examiner.
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119

- 13) ☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).
- a) ☐ All b) ☐ Some* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- *See the attached detailed Office action for a list of the certified copies not received.
- 14) ☒ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

Attachment(s)

- 15) ☒ Notice of References Cited (PTO-892)
- 16) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 17) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s). 4-6
- 18) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 19) ☐ Notice of Informal Patent Application (PTO-152)
- 20) ☐ Other: _____

Art Unit: 2173

DETAILED ACTION

1. This Office Action is in response to the patent application (09/665,367) filed on 9/19/2000.

Priority

2. Claims Priority from Provisional Application (60/ 203,128) filed on 5/8/2000

Information Disclosure Statement

3. IDS submitted

Status of the claims

4. Claims 1-48 are pending.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. ***Claims 1-6, 8, 10, 13-18, 20, 22, 25-30, 32, 34, 37-42, 44, and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by Matthews, III et al (5,724,492).***

Art Unit: 2173

Matthews, III et al (5,724,492) relates to the field of entertainment systems and in particular, to a method and apparatus for automatically configuring a system based on user's monitored system interaction and preferred system access times.

Per claims 1, 13, 25, and 37:

Matthews, III et al ("Matthews") discloses a method for displaying a channel manager or an Electronic programming guide (see fig. 7). The method includes displaying a three dimensional plane surfaces ("polyhedron") (see fig. 7); wherein each plane surface includes at least one object, such as *NBC* object (see Fig. 7) and said object includes at least one interactive surface selected by a viewer (see Fig. 7).

Per claims 2, 14, 26, and 38:

Matthews further discloses the channel manager could be displayed as a three dimensional object shown in perspective or orthogonal view ("isometric view") (col 15, lines 15-35).

Per claims 3, 15, 27, and 39:

Matthews discloses a high end "PENTIUM" microprocessor that supports a graphics-intensive (such as 3D), graphics-based presentation of program-related information. The channel manager panels are presented as part of a three-dimensional structure (col 10, lines 40-59, col 12, lines 28-col 13, lines 2).

Per claims 4, 16, 28, and 40:

Art Unit: 2173

The channel manager of Matthews provides a user interface that facilitates the browsing and selection of an items such as channels from a group of multiple items, associated with certain time (col 5, lines 52-col 6, lines 4, col 2, lines 18-39).

Per claims 5, 17, 29, and 41:

Matthews provides a method and system for selecting a visible control item independently of the three dimensional plane surfaces and for supplying the user with an indication of other control items that are available for selection by the user (col 5, lines 52-col 6, lines 4). Also describes the three-dimensional menu 1005 is a collection of panels. It is used to present unique menu lists on each panel (col 17, lines 63-col 18, lines 9).

Per claims 6, 18, 30, and 42:

Matthews' interactive system includes application for an electronic program guides and video on demand services, wherein certain television programs on a certain channels at a certain times are presented (col 14, lines 51-58).

Per claims 8, 20, 32, and 44:

Matthews' interactive system includes a multi-sided panels which are parallel (see Fig. 7).

Per claims 10, 22, 34, and 46:

The system of Matthews employs three-dimensional images or pictures and animation to display three-dimensional object (col 20, lines 38-48).

Art Unit: 2173

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. ***Claims 7, 9, 19, 21, 31, 33, 43, and 45 rejected under 35 U.S.C. 103(a) as being unpatentable over Matthews, III et al (5,724,492) and Nakano et al (6,043,818).***

While Matthews' interactive system includes a multi-sided panels ("polyhedron"), but these surface planes are not explicitly described as a cube. Furthermore "planes correspond to levels of preference." also not shown. However, Nakano discloses interactive cubic display (*claims 7, 19, 31, and 43*), wherein users can activate any function in the cubic wall by clicking a button. Nakano further discloses a cubic planes arranged and displayed in four sides of a cube, wherein depending on user's preference each face of the cube can be selected to be shown or displayed in front, left, right or top of the cube (see figs. 17-21, col 15, lines 12-col 16, lines 3) (*claims 9, 21, 33, and 45*). Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention was made to incorporate the interactive cubic shape surface planes with a multi-sided panels of Matthews'. Thus, Matthews' system will provide a viewer a preference setting of interactive objects on each cubic surface display.

Art Unit: 2173

9. *Claims 11, 12, 23, 24, 35, 36, 47 and 48 rejected under 35 U.S.C. 103(a) as being unpatentable over Matthews, III et al (5,724,492) and Nakano et al (6,043,818) and further in view of Williams et al (5,977,964).*

While Matthews' and Nakano disclose an interactive three dimensional a multi-sided panels (cube), but they are not explicitly disclose that the three axes of the cube correspond to time, channel, and user preference. However, Williams discloses this shortcomings. Williams relates to the field of entertainment systems, wherein Williams provides a method for automatically configuring a system based on a user's monitored system interaction and preferred system access times. Fig. 9 shows a display of television schedule grid configurable option which can vary from user to user base on the user's preference. A user can select a particular portion of the grid by moving a cursor across the grid to a cell in the grid that contains the title of the program available during the displayed time period. The system also displays the channels in the grid in the order of most frequently watched (fig. 9, col 7, lines 31-col 8, lines 24). Thus the system of Williams discloses these axes corresponding to time, channel and user preference (see fig. 9) (claims 11, 12, 23, 24, 35, 36, 47 and 48).

Conclusion

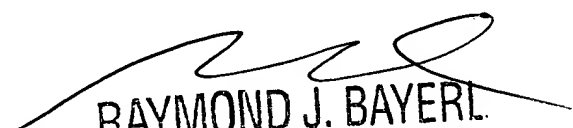

10. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to *Tadesse Hailu*, whose telephone number is (703) 306-2799. The Examiner can normally be reached on M-F from 9:00 - 5:30 ET. If attempts to reach the Examiner by

Art Unit: 2173

telephone are unsuccessful, the Examiner's supervisor, *John Cabeca*, can be reached at (703) 308-3116 Art Unit 2173 CPK 2-4A51

11. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-3900.

Tadesse Hailu 25 July 2001
